Kodak

Capture Pro Software

The application that gives you more scanning productivity, value, and ease of use

Kodak Capture Pro Software is the one application you need to make, manage, and move images and information. Get powerful, flexible batch capture and productivity on Kodak and other popular scanners in any scenario—from desktop to high-volume production. Realize greater value with no per click or volume charges. Start scanning right away with preconfigured setups and a single, user-friendly interface. Start doing more, more easily.

Be more productive

You can easily integrate and configure Capture Pro Software with existing applications (with point and click configuration), including ECM systems, databases, **Microsoft SharePoint** (2007 and 2010), **EMC Documentum** and more.

- > Scan, index, extract data, store, organize, preserve, access, comply, process and distribute documents and metadata digitally for greater efficiency
- > Take advantage of shared settings through multi-user support
- > Integrate with existing and new imaging systems
- > Individual APIs go beyond simplified job setup and user management capabilities so you can customize to exact needs; more powerful indexing API improves data integrity and reduces errors
- > Streamline content management to boost your productivity and get information to the right people and places, faster
- > Auto Import continuously and automatically brings in existing files (including PDF) from “hot folders,” and performs many of the same imaging functions as with scanned images
- > Enable others to easily retrieve images with the included *Find and View* application
- > Validate or populate index fields with data from Open Database Connectivity-compliant (ODBC) sources with Database Lookup
- > Output to file, system, e-mail and print simultaneously, and choose any supported file type when outputting images in black and white (PDF, PDF/A, searchable PDF, TIFF, RTF, TXT and more) or color/grayscale (JPEG, JPEG 2000, PDF, PDF/A, searchable PDF, TIFF and more)
- > Produce bitonal and color or bitonal and grayscale images from a single scan
- > Stay productive with background output processing
- > Supported Under **Microsoft Windows XP, Vista,** and now **Windows 7**

Auto Import automatically acquires and processes files from any source

Get more **value** for your investment

Pay no click charges. Forget about additional, volume-based costs. Instantly access productive features like automated indexing, drag-and-drop OCR and more. Discover the capture solution that's easily scaleable from desktop to production scanners, so once an operator is familiar, he or she is familiar with every scanner from Kodak or other popular manufacturers.

- > Reduce training costs and setup fees
- > Output unlimited searchable PDFs at no added cost
- > Loads of features, low total cost of ownership and fast ROI = great value

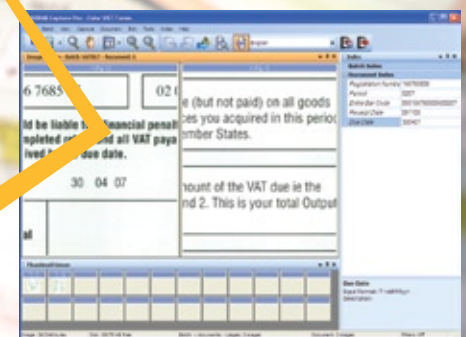

**Supports Kodak Scanners
and scanners from other
popular manufacturers**

Accomplish more, **quickly** and **easily**

Unlike competitive software requiring extensive job, profile and page setups, Capture Pro Software lets you scan "out of the box," thanks to workstation-based, ready-to-scan setups. (Single-touch-simple customization is also easy for automation of complex or repetitive tasks.)

- > Instantly familiar, intuitive interface with no complex commands to learn
- > Get immediate visual feedback, no matter how complex the task
- > Flexible, easy, automated indexing, including drag-and-drop OCR
- > Interactive tutorial in multiple languages, fully printable user's guide, plus real-time online help

**Faster, easier indexing with
drag-and-drop OCR**
