

## Intelligent Automation You Can Trust

ImageTrust is the world's most intelligent web-based capture platform that enables centralized and remote document intake and understanding. AI orchestrated capture allows for process automation to be achieved, by increasing accuracy, and delivering trusted content clarity to your organization. Physical and digital content will continue to negatively impact your operational efficiency if the latest technology cannot be leveraged due to outdated infrastructure.

### INTAKE

ImageTrust supports physical and digital omni-channel content collection. From e-submissions and e-mail to mobile and physical scanners, ImageTrust can be integrated and optimized. ImageTrust works with any iOS or Android device, as well as any TWAIN/ISIS scanner to drive desktop devices to production-oriented devices (210 pages per minute) all through the web-browser. With ImageTrust large scanner fleets can be centrally managed, offering user authentication, job menus, and scan setting configuration controls, which maximize business efficiency. ImageTrust can also eliminate the need for scanner driver installs, by using onboard intelligence and connecting to the device via the web-browser for a true zero footprint scanning experience, that is hassle free.

## Don't Get Locked in By Legacy Capture

The ImageTrust platform was designed and developed to flexibly leverage the latest artificial intelligence and machine learning engines to eliminate time consuming and costly template creation.

### INTELLIGENCE

Through AI orchestration, complete configuration around your content occurs, to determine if Google, Microsoft, Amazon, or a combination of them all, will deliver extraction accuracy that leads to increased automation. The ImageTrust platform provides intuitive access to AI through a manageable intuitive user interface that drives effortless employee efficiency, and allows your business to move at the pace of technology and faster than the competition.

### INTEGRATION

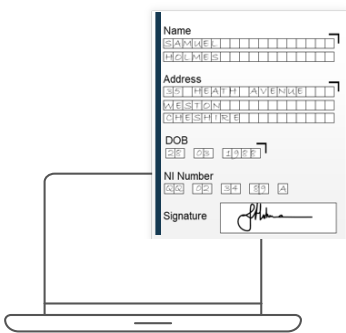

The ImageTrust platform openly integrates with legacy ECM solutions as well as newer cloud-based offerings. The ImageTrust document intake and manipulation interface can also be embedded into any web-based workflow solution like Salesforce, Box, SharePoint, or even a custom client portal, delivering added intelligence when and where you need it.

## REDACTION

Digital documents containing sensitive information can be easily accessed by individuals in your organization. ImageTrust uses advanced classification techniques that allow you to find and manage sensitive data to prevent the unintentional release of this information. Our automatic redaction features eliminate individual oversight and guide the end user in real time for guaranteed redaction accuracy.

**STRONG ENCRYPTION**  
Data encrypted in transit and at rest

**MODERN**  
Web-based enterprise architecture that is easy to manage and maintain

**INTEGRATED**  
Enterprise class integrations to all leading content services platforms

**SCALABILITY**  
Easily onboard new departments & jobs

**CONTENT COLLECTION**  
Capture or import content (physical or digital) from anywhere with IT

**OPEN INTELLIGENCE**  
Open AI for guaranteed extraction accuracy

## TRUSTED FEATURES

Our key features allow you to automatically transform complex content into usable data through:

- **Advanced Document Classification** - Automatically categorize documents into pre-defined document classes. ImageTrust is able to detect the most subtle differences for distinguishing document types.
- **AI Orchestration** - Directly integrated with the most advanced OCR/ICR technologies to deliver high levels of extraction accuracy on the most diverse document sets, structured or unstructured.
- **Advanced Form Designer** - Data entry screens that mirror your documents allow for simplified real time validation.
