Alaris Info Input Solution

Fast, Smart, Efficient Web-based Capture

Transform Your Capture

Info Input Solution is a powerful web-based solution that enables capture for centralized, distributed, and remote locations to validate, index, and route information to the right business applications. This results in decreased operational and support costs and increased process efficiencies.

Accomplish more, everywhere

A browser-based platform, Info Input Solution makes it easy to deploy capture solutions across your organization. For example, major Business Process Outsourcing firms (BPOs) value this browser-based platform because it allows them to empower capture solutions with ease — on- and off-premise.

- Info Input Solution is capable of supporting both production and distributed scanning environments

- Captures business-critical information via an app on your mobile or smart device and sends documents quickly into your business application

- Maintains productivity even with low bandwidth or no web connection

- Securely stores documents locally for 24 hours with no loss of productivity
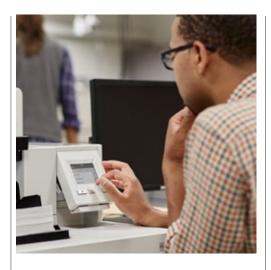

Maximize efficiency with accurate capture and streamlined workflow

Intelligent features such as advanced indexing and expert extraction get information into your business processes faster. As an example, Accounts Payable Departments can benefit from the embeddable transactional client to scan receipts directly into their applications.

- Powerful image adjustment tools improve image quality by correcting skewed scans, adjusting contrast, and more

- Multiple indexing options allow you to extract the key information you need

- Users can train the program for faster data extraction from key documents, reducing processing time

- Drag and drop files into different batches

- Enables monitoring of batch status to check details and prevent duplication

- Pushes system upgrades to 1,000s of users instantly

"The combination of **Kodak** Scanners with this solution has increased our scanning productivity by over 60%."

– Operations Director of a major BPO provider

Reliable information, world-class support

Info Input Solution helps ensure that you capture valid, complete information on the first scan. An example of this – State Agencies value barcode reading abilities to help them manage challenging documents on the fly and deliver accurate data to a variety of applications.

- Determines document type for correct processing after scanning via barcodes

- Validation Scripts and Database Lookups ensure flexibility for administrators to enforce business rules, perform multiple database lookups and validate data

- A range of tools and features such as drag and drop OCR ensures that validation is carried out effectively to minimize rework later

- Simplifies data archiving and ensures a consistent chain of custody across multiple platforms, essential in compliance and audits

Simple to integrate with your business systems

The Solution's intuitive user interface requires minimal training and reduces errors. For example, Brokerage Firms benefit from this simplicity for client onboarding kiosks.

- Easy to setup using your existing infrastructure, reducing maintenance costs

- No desktop software required

- Offers centralized, consistent job setup and configuration with workflow/output available regardless of what platform or device is used

- Connects to Enterprise Content Management, Enterprise Resource Planning, Business Process Management, and Workflow Solutions

- Exports to any ODBC-compatible database or to a delimited ASCII file

- Deploys new projects in minutes and quickly imports job setups from other current systems such as **Kofax**

Grow and take on future needs

Organizations like Financial Services benefit from the flexibility of future-proofing their capture solution and integration.

- Grows with your capture needs—from a single department to complex, high-volume enterprise requirements

- One server can support 1,000s of users, and process billions of pages

- Both **SQL** Server and **Oracle** Database support

- Supports **Windows**, **Linux** operating systems

> "This solution has virtually 100% uptime, which is amazing considering we have over 6,000 users throughout the state responding to requests for vital services."
>
> – IT Director, State Department of Human Services

Info Input Solution configurations

Info Input Solution – Batch Capture

The client/server, browser-based architecture extends Capture, ECM, ERP, and Cloud environments. The solution leverages advanced capture and other web services already in place, in real time, during the capture process.

Info Input Solution – Transactional Client

Embedded in a browser-based application as a scan-button plugin, capture is no longer a separate multi-step process: it's now part of a familiar workflow for users to scan, import eDocs, and index within familiar business applications.

Make a change that makes a (big) difference

As a common platform for capture, Info Input Solution delivers greater productivity and ease to lower your costs and increase your efficiency. It's an ideal match for all capture, Enterprise Content Management, and business environments.
Change your capture and change your business with Info Input Solution –

• Performance second to none for browser-based capture

• Respond more quickly to customer requests

• Bring in ALL file types in one streamlined step

• Deliver meaningful data (and metadata) automatically

• Process documents and information faster

• Leverage your investments in existing services

• Reduce IT support burdens significantly

• Use the latest software and job definitions seamlessly across your system

• Eliminate capture and information silos
